

# HOW DO YOU LIFT A LION?

**I challenge you to lift a lion!**  
(or other wild TOY creature that you may have to hand)

Can you show me 3 different ways to move your animal?

Brainstorm different ways you could do this.

Could you use something that rolls? Could you use a pulley? Could you use levers?

You could draw a plan of your contraptions.

Think about what you will need to make it and then collect the materials.

Make it and see if you can move your animal.

Was it a success? Did you have to make any fix-its along the way?

Which way was the best? Why?

I'd love to see a picture!

(no lions were harmed in the making of this lift)
